

Premier Program Series

Effective Demonstrations Course Description

Whether in a welding lab or a bioscience lab, effective demonstrations are crucial. If done correctly every student can successfully perform the new skill with little or no frustration, without wasted materials, and attain proficiency in a way that will ensure the whole class progresses at an appropriate pace. This is a real career extender! When you are successful in the lab, and the students are successful in the lab, teaching can be very rewarding. An added bonus is that students complete the new skill in a safe environment. Come and learn this four-part demonstration method.

This is an ADE approved Professional Development Event. Upon completion of this training and any homework assigned you will earn the equivalent of one college credit.
