

# Premier Program Series

## Laboratory Safety and Management Course Description

Are you ready for students in the lab? This workshop is designed to help participants develop a laboratory improvement plan including management, clean-up procedures, safety procedures, and meeting monitoring agency mandates. Join us as we identify a variety of practical steps you can take to ensure that your students are safe in the laboratory and that you are protected. Participants will have the opportunity to evaluate their CTE labs and develop a management system for their CTE labs. You will also be treated to a variety of techniques to enable you to manage your lab effectively and efficiently. Additionally, you will gain new skills needed to utilize a proven methodology of teaching in the lab or shop.

This is an ADE approved Professional Development Event. Upon completion of this training and any homework assigned you will earn the equivalent of one college credit.
