

Arizona Technology and Industrial Education Association
1957 West Javelina Circle
Mesa, AZ 85202

The Arizona Technology and Industrial Education Association (ATIEA) is the professional association for Career and Technical Education teachers in the Industrial Technology content areas in Arizona. The purpose of the Association is to foster a spirit of cooperation and understanding between teachers and industry, to provide professional development opportunities for teachers, to increase both technical and professional knowledge, and to provide scholarship assistance to students. The ATIEA accomplishes this mission by providing professional development and networking workshops at various events and scholarships to students for post secondary training.

The ATIEA plans and implements two professional development events every year: the ATIEA Professional Development Day, and training and networking sessions at the Association for Career and Technical Education-AZ (ACTE-AZ) Summer Conference. Both these events are highly successful and have provided many teachers with content area training and a chance to network and learn from fellow teachers. In addition, the ATIEA also plans and implements the ATIEA Roundtable, a sort of a speed dating event for teachers and vendors to meet and show their best stuff in small intimate groups. **This event will be held at the Westin LaPaloma in Tucson, AZ during the ACTE-AZ Conference in July 2022.** Immediately after the Roundtable, the ATIEA will hold a reception in the same room for an informal networking event to help build ties of professional and personal relationships and to provide recognition to our industry supporters.

We are requesting your financial and material support for all our activities. In particular, we are seeking sponsors for the Roundtable and Reception, and to support our scholarship fund. In the past our supporters have assisted us financially by making their donations directly to the ATIEA. Knowing in advance of the Conference of our industry partners the level of support allows us to better plan and implement the activities at the conference. In addition to financial support, we are seeking door prizes for our teacher participants. In the past, these prizes have included hats, T-shirts, small tools, as well as portable power tools, robotics kits and any other merchandise you are willing to provide. Any material donation is greatly appreciated by the teachers in attendance. If needed, we can make arrangements to pick up the donations in advance or can pick them up from you at the Conference.

If you are able to assist the ATIEA with its mission, please contact Brady Mitchell, President, or Phil Howardell, Treasurer, at the addresses below. Please let us know how much you are able to donate and for which activity, the Conference activities or the Scholarship Fund, or if you have materials and equipment to donate for door prizes. Please let us know if you need us to pick them up. If you choose to make a monetary donation, we request you send it at your earliest convenience so we can better plan the conference. That being said, any contribution and at any time will always be greatly appreciated.

We want to thank you in advance for considering supporting the ATIEA in our work to assist to better the profession and help our students realize a greater future. Please contact either Brady Mitchell or Phil Howardell if you have any questions regarding this request.

Respectfully
